

“The story of the drops”

3A

Blanca and
Cristal were
two drops of
water.

They lived in
the same cloud
with thousands
of other drops.

One day there was a loud noise.

- Is it thunder? asked Blanca.

- It is a storm! answered Cristal.

Oh! If it rains we will fall down all together and this cloud will dissapear and... Where will we go?

The two drops hugged each other and it started raining.

The enormous cloud transformed into thousands of drops.

- Bye bye Blanca!
- Goodbye Cristal!

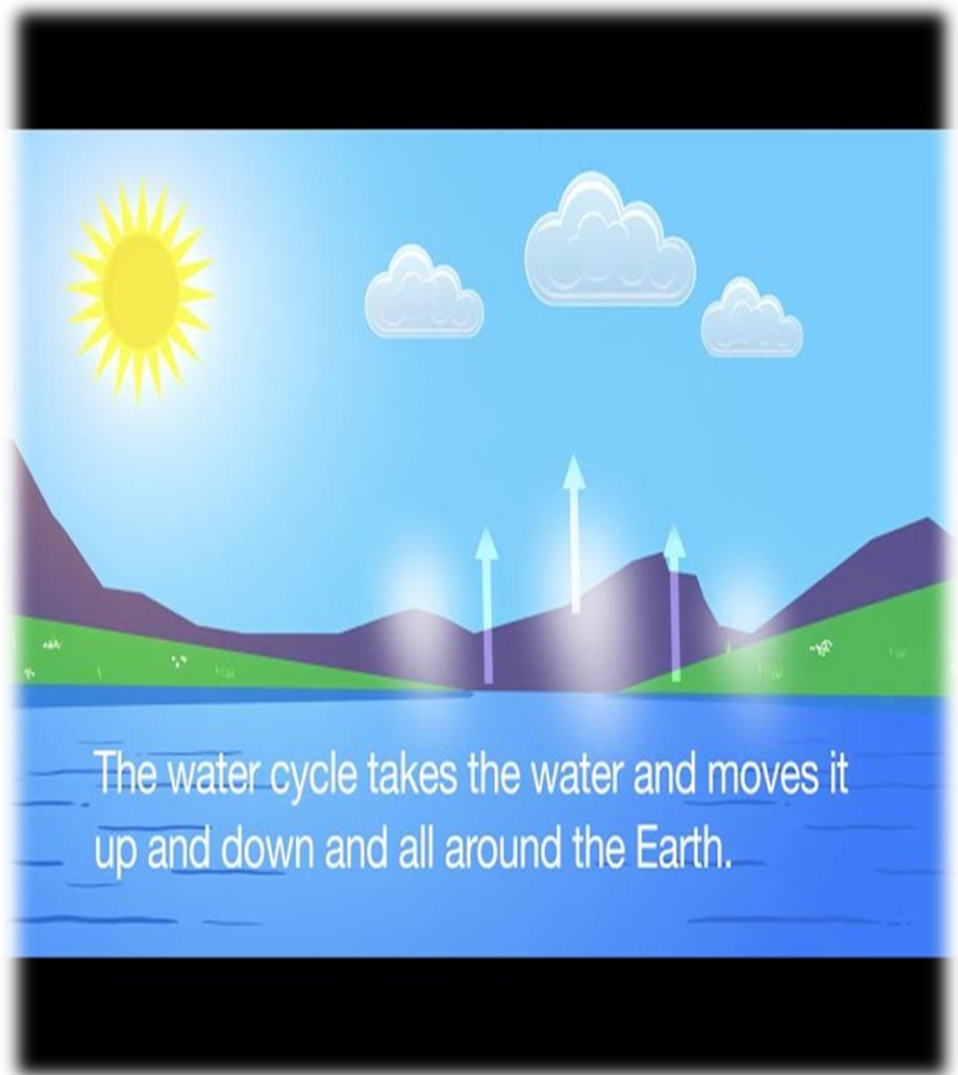

And...they fell down
to the ground.

Cristal fell into a
river with other
drops transported by
the current.

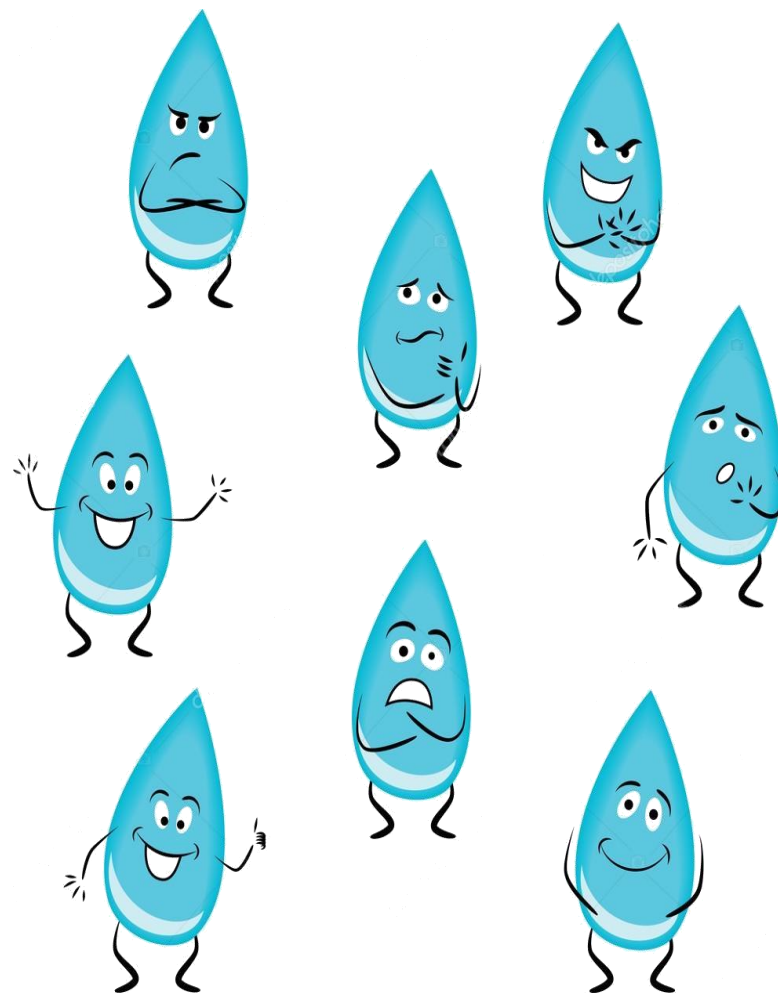

They went through
the valleys and
villages at a great
speed.

Finally they arrived
at the sea.

Cristal said: The sea is so big!. There are thousands of drops. And then asked: where did you come from?.

The drops said: We fell from the clouds as rain.

One day, the sun appeared in the sky and they began to feel warm and they returned to the sky again..

Together they made a
new cloud in the sky.
The cloud was little
and white.

Blanca! *shouted*
Cristal.

*What a surprise to
see you again!*

THE END
